The need for this kind of support is much needed! According to a recent [report by the CDC](#), "The most recent provisional data...indicate[s] that approximately 81,230 drug overdose deaths occurred in the United States in the 12-months ending in May 2020. This represents a worsening of the drug overdose epidemic in the United States and is the largest number of drug overdoses for a 12-month period ever recorded."

Thank you for helping us in 2026 as we work to combat the addiction epidemic. Together, we can make a difference!
